

****ATTENTION RESIDENTS & PROPERTY OWNERS****

IMPORTANT TOWN NOTIFICATION SYSTEMS

Subscribe To Receive  Notifications

<https://local.nixle.com/register/>

To subscribe for NIXLE alerts, please use the above link and follow the steps as prompted. NIXLE is used by the Waterville Valley Department of Public Safety to issue alerts to the public. These can range from road/weather conditions, and also well town news and important notifications. You can choose which format method of the message you would like to receive from email, text or voice recordings. This is a FREE SERVICE and all owners and/or residents are encouraged to register.

Subscribe To Receive Town Website Notifications

<https://www.watervillevalley.org/subscribe>

We have implemented a way of keeping our residents informed of events and meetings that are occurring in the town. Whenever a new event or document is posted to the Web site you have an opportunity to receive a copy of that posting in your personal Email box, automatically. It won't be necessary to visit the Web site, although we encourage you to do so, since you will not be able to subscribe to all folders. And if you decide that you no longer want to receive notices automatically, you can use the following form to remove your name from the list.

How to Subscribe: For example, to properly subscribe to News & Announcements you are required to supply the following information:

- Your Email Address
 - Select from the Mail Lists: e.g. Urgent Alert, Meeting Agenda, Meeting Minutes, or News & Announcements. There are also sub-categories for each of the lists by department.
-

Subscribe To Receive Grafton County Notices

Keeping citizens informed.

<https://public.coderedweb.com/cne/en-US/F4F68ACDD47F>

Grafton County has instituted the CodeRED Emergency Notification System - an ultra high-speed telephone communication service for emergency notifications. This system allows us to telephone targeted areas of Grafton County in case of an emergency situation that requires immediate action (such as a missing child or evacuation notices). The system is capable of dialing thousands of phone numbers per hour. It then delivers our recorded message to a live person or an answering machine, making three attempts to connect to any number.
